

(Abstract)

M. Com (Five Year Integrated) Programme CBCSS in the Department of Commerce & Business Studies in Dr P K Rajan Memorial Campus, Nileswaram - Scheme and Syllabus (7 to 10 Semesters) - Approved and Implemented w.e.f-2022 admission - Orders Issued.

ACADEMIC C SECTION

ACAD C3/1010/Int. MCom./2022

Read:-1. UO No.ACAD C3/1010/Int. MCom./2022 (I) dated 10/10/2023

- 2. U.O of even number dated 10/04/2024.
- 3 Email dated 08/08/2025 from Dr A Ashokan, Convenor, Expert Committee, M. Com (Five Year Integrated) Programme CBCSS

Dated: 14.10.2025

- 4. Email dated 25/09/2025 from Dean, Faculty of Commerce and Management Studies.
- 5. Minutes of the meeting of Standing Committee on Academic Council held on 29/09/2025
- 6.Orders of the Vice Chancellor in the file of even number dated 14.10.2025

ORDER

- The Scheme (All Semesters), Syllabus & Pattern of Question Papers (1st to 6th Semesters) for M. Com (Five Year Integrated) Programme CBCSS were modified and implemented in the Department of Commerce & Business Studies, Dr P K Rajan Memorial Campus, Nileswaram w.e. f 2022 admissions as per paper read as 1st above, and certain modifications were effected to the same vide paper read 2nd.
- 2. As per paper read as 3rd above, Dr A Ashokan, Convenor, Expert Committee M. Com (Five Year Integrated) Programme CBCSS forwarded the Scheme and Syllabus of (7-10 Semesters) of M. Com (Five Year Integrated) Programme CBCSS for approval and implementation w.e.f 2022 admission.
- 3. The Scheme and Syllabus of (7-10 Semesters) of M. Com (Five Year Integrated) Programme CBCSS were forwarded to the Dean, Faculty of Commerce and Management Studies for verification and the Dean after verifying the same found it in order and recommended further proceedings as required for implementation, vide paper read (4).
- 4. After considering the matter, the Vice Chancellor has ordered to place the Scheme and Syllabus of M. Com (Five Year Integrated) Programme CBCSS Programme, before the Standing Committee of the Academic Council for consideration.
- 5. The Standing Committee of the Academic Council vide the paper read (5) above, recommended approve the Scheme and Syllabus of 7-10 semesters of M. Com (Five Year Integrated) rogramme CBCSS, for implementation we find 2022 admission.
- The Vice Chancellor after considering the recommendation of the Standing Committee of the Academic Council and in exercise of the powers of the Academic Council conferred under Section

- 11(1) Chapter III of the Kannur University Act, 1996 and all other enabling provisions read together with, approved the Scheme and Syllabus of the 7-10 semesters of M. Com (Five Year Integrated) Programme CBCSS at the Department of Commerce & Business Studies in Dr P K Rajan Memorial Campus, Nileswaram and accorded sanction to implement the same w.e.f.2022 admission subject to report to the Academic Council.
- 7.The approved Scheme and syllabus of 7-10 semesters of M. Com (Five Year Integrated) Programme CBCSS, offered by the Department of Commerce & Business Studies in Dr P K Rajan Memorial Campus, Nileswaram, is attached with this U.O. and uploaded in the website of the University (www.kannuruniv.ac. in)
- 8. Orders are issued accordingly.

INDIAN ECONOMIC DEVELOPMENT

SEMESTER	COURSE CODE		CREDIT	MARK		EXAM
		/WEEK			100	HRS
				CE	ESE	
VII	7B15ICOM	05	04	40	60	03

Course Description:

This course provides a comprehensive overview of economic development and practices with a focus on Indian economy and its developmental journey. It examines the evolution of the economy from structure to current aspects and analyses India's development experience from pre-independence to contemporary issues.

Course Outcomes:

CO No.	Expected Outcome
1	Students will be able to understand the developmental journey of the Indian economy
2	Analyse the various determinants of he society in the growth and development of the economy
3	Evaluate the role of various sectors, foreign trade, in economic development
4	Critically assess India's development experience, including the successes, challenges, and implications for future policy

^{*}Remember (R), Understand (U), Apply (A), Analyse (An), Evaluate (E), Create (C)

MODULE I INTRODUCTION

Concept of Economic Growth, Economic Development, measures of Economic Dvelopment, Basic Characteristics of Indian Economy, Indian economy in british rule - Structure of Indian Economy: Role of Primary Sector, Secondary Sector & Tertiary Sector, -Trends in National Income, Occupational Distribution, Work Force Participation and Changes in Occupational Structure, GDP & GNP (20 HOURS)

MODULE II INDIAN ECONOMY - POST INDEPENDENCE

Planning and Economic Development, Problems in Indian Economy, Objective of Economic Planning in India, Five Year Plans, Industrial Policy, Disinvestments of Public Enterprises, Economic Problems: Poverty, Inequality, Parallel Economy, Unemployment, Concentration of Economic Power, unbalanced Regional Development – Indian economic reforms and liberalisation 25 HOURS

MODULE III INTERNATIONAL TRADE AND INDIAN ECONOMY

Indian Economy and Foreign Trade, Foreign Exchange Reserve, Balance of Payment, Balance of Trade, EXIM policies, Foreign Exchange Regulation Act (FERA) Foreign Exchange Management Act (FEMA), World Trade Organization and Indian Economy Emerging issues in international trade, Foreign Direct Investment, Portfolio Investment & Foreign Institutional Investors (30 HOURS)

MODULE IV INIAN ECONOMY IN CONTEMPORARY WORLD

Emerging Issues and Challenges- Demographic transition and its implicationshuman development indices health education and poverty-Climate change and sustainable development- Anti-corruption measures and good governance practices-current challenges and opportunities of Indian economy (20 HOURS)

Text Books:

BUSINESS ENVIRONMENT AND POLICY

SEMESTER	COURSE CODE	HOURS /WEEK	CREDIT	MARK 100		EXAM HRS
				CE	ESE	
VII	7B16ICOM	05	04	40	60	03

Course Objective:

To enable students to evaluate business and its environment.

To develop an understanding of the various elements that constitute the business environment, both internal and external, including economic, political, social, technological, and legal factors.

To provide knowledge of the environment in which businesses operate, the economic operational and legal framework with particular application to the transaction of business.

To enable students to discuss the contemporary issues in business

Learning Outcome:

After completion of this course, learners will be able to outline various components of Business Environment, the impact of business environment on business activities, apply the knowledge to analyze the current situations and take prudent decisions, concept of corporate social responsibility, corporate governance and business ethics.

Unit I

Business Environment: Introduction to business environment. Business and Environment interrelationship, Significance and nature of business environment; Elements of environment - Types of Environment — Micro and Macro Environment -Environmental Analysis Stages — Approaches — Techniques of Environmental Analysis —internal and external, Changing dimensions of business environment.: Impact of environment on business and Strategic Decisions - Culture and business - Social Responsibilities of Business.

Unit II

Economic Environment: Concept – Nature –Scope – Elements of Economic Environment – Economic System and Business Environment – Economic planning – Industrial policy – Fiscal policy – Monetary Policy –New economic policy.

Political Environment: Concept and Meaning of Political Environment Political Institutions –Legislature-Executive-Judiciary- impact of political Environment of Business Decisions

Socio-Cultural Environment : Elements of socio cultural Environment ,Social Institutions and system ,Social Values and Attitude , Social groups.

Unit III

Industrial Policies and Regulations - Industrial Policy- Economic Systems-Capitalism-Socialism –Mixed Economy- Features and Merits and Demerits of the respective systems-Economic Planning in India-Objectives and limitations of Planning-Economic Policies- New Industrial Policy)-Monetary Policy-Fiscal Policy-Exim Policy of India.

Unit IV

Natural and technological environment -Natural Environment, Technological Environment, Innovation, Technological Leadership and Fellowship, Technology and Competitive Advantages, Sources of Technological Dynamics, Time Lags in Technology Introduction/Absorption, Appropriate Technology and Technology Adaption, Impact of Technology on Globalization

Unit V

International Environment – Meaning and concept – World Bank – International Monetary Fund (IMF) – The General Agreement on Tariffs and Trade (GATT) – The World Trade Organization.

Current Issues in Business Environment – Urbanization – Population – Public distribution system – Natural environment — Pollution – Environmental management.

DATA MODELLING AND FORECASTING I

SEMESTER	COURSE CODE	HOURS /WEEK	CREDIT	MARK100		EXAM HRS
				CE	ESE	
VII	7B17ICOM	05	04	40	60	03

Course Objectives:

- To introduce core methods in business analytics and their use in solving real-world business problems.
- To enable students to understand, prepare, and visualize data effectively.
- To train students in basic statistical modeling and decision-making using simplified tools.

Module I: Methods in Business Analytics

- Overview of Business Analytics Life Cycle
- Types of Analytics: Descriptive, Diagnostic, Predictive, Prescriptive
- Frameworks and Tools for Business Analytics
- Business problem identification and framing analytics questions
- Examples of analytics applications in marketing, finance, HR, and operations

Module II: Data Preparation and Preprocessing

- Sources of business data: transactional, web, social, sensor
- Data cleaning: handling missing values, duplicates, noise
- Encoding categorical data, normalization, and feature scaling
- Introduction to data wrangling using Excel and Python (pandas)

Module III: Descriptive Analytics and Visualization

- Summary statistics: mean, median, mode, standard deviation, percentiles
- Correlation, cross-tabulation, and pivot tables
- Data visualization using charts, plots, dashboards
- Case studies using Excel/Tableau/Google Data Studio

Module IV: Basic Predictive Modeling

- Introduction to supervised learning
- Simple linear regression
- Logistic regression (conceptual only)
- Model evaluation: accuracy, confusion matrix, basic error metrics

CORPORATE TAX PLANNING AND MANAGEMENT

SEMESTER	COURSE CODE		CREDIT	MARK100		
		/WEEK				HRS
				CE	ESE	
VII	7B18ICOM	05	04	40	60	03

Course Objectives:

- To familiarize the students with major and latest provisions of the India tax laws
- To enable the learners to advise assessees regarding their income tax queries
- To provide knowledge to the students about provisions of corporate taxation in practical terms and use of the tax planning methods to minimize tax liability
- To make students acquainted with the concept of corporate tax planning and Indian tax laws, as also their implications for managerial decision making.

Course Outcomes:

On completion of this course, students will be able to

- Understand the nature and scope of tax planning and management
 - Learn tax planning concepts and apply the same in real life situations
 - Understand about the assessment procedures, TDS and advance payment of tax and application in various situations
 - Justify the need for corporate tax planning and management

Module I

Introduction to Tax Planning and Management -Concept, Need and Significance of tax planning and management- Advantages and Limitations of tax planning- Tax Avoidance and Tax Evasion- Tax planning for new business: Tax planning with reference to location, nature and form of organization of new business- Tax planning tips for individual assessee- Tax Planning in respect of residential status (15 Hours)

Module II

Assessment of Individuals-Individual's Tax Planning with reference to all fiveheads of income for individuals – Salary, House Property, Profit from business and profession, Capital Gains and Income from other sources – Tax planning with respect to deductions, exemptions, Rebate, Relief, Concession and incentives. (20 Hours)

Module III

Assessment of Companies: Residential status and incidence of tax-Special

provisions applicable to assessment of total income of companies—Deductions available to corporate assesses — Computation of taxable income of companies and determination of corporate tax liability — Minimum Alternate Tax-Security Transaction Tax — Tonnage Tax- Marginal Relief

(20 Hours)

Module IV

Income Tax Authorities and Assessment Procedures: General and specific powers of Income Tax Authorities, Voluntary Return of Income -Return of Loss-Types of Return-Forms of Return of Income, Filing of Return through TRP - e-filing of return-PAN-TAN -TIN -Assessment-Types- Rectification of mistake –Advance Payment of Tax- Interest on short fall- Refund of Tax - Double taxation avoidance

(15 Hours)

Module V

Tax planning and Managerial Decisions: Tax Planning relating to capital structure decisions, Dividend policy, Bonus share and Debentures-Tax planning in respect of make or buy, own or lease, repair or replace, export or domestic sales, shut down or continue, expand or contract, amalgamate or demerger, invest or disinvest-Special Tax Provisions: Tax provisions in respect of Free Trade Zone, Infrastructure Development, Backward Areas, Tax Incentives to Exporters. (20 Hours)

ADVANCED CORPORATE ACOUNTING

SEMESTER	COURSE CODE	HOURS /WEEK	CREDIT	MARK100		EXAM HRS
				CE	ESE	
VII	7B19ICOM	05	04	40	60	03

Course description

This course is designed to provide theoretical knowledge of International Financial Reporting Standards. It provide the students with an understanding of accounting procedure for corporate restructuring. This course help the students understand the applications of Accounting Transactions in Corporate Sector. It enable the students to gain ability to solve problems relating to Holding Company Accounts and familiarize the students about the concept of Investment Accounting, Human Resource Accounting and Accounting for Price Level Changes

COURSE OUTCOMES

CO No.	Expected outcome	Learning Domains
	Demonstrate a comprehensive understanding of the aims, characteristics	R,U
CO1	principles, and variables of International Financial Reporting	
	Demonstrate a comprehensive understanding of understanding of accounting	R,U,A
CO2	procedure for corporate restructuring	
CO2	Define and differentiate between skill, technique, and style in calculating goodwill	R,U,A
CO3		
	Demonstrate a comprehensive understanding and application of identifying the	A, AN,E,C
CO4	problems in investment opportunity	

After the completion of the course, the students will be able to -*Remember(R), Understand(U), Apply(A), analyze (An), Evaluate (E), Create(C), and Synthesis (Sy)

Module I: International Financial Reporting Standards (IFRS)

(Hours of transaction:10)

Introduction – Meaning – Scope – An Overview of the International Financial Reporting Standards – IFRS 1 to 13 – Role of IASB - Achievements of IASB and Obstacles in Convergence – Difference between IFRS and Indian Accounting Standards

Module II: Valuation of Goodwill (Hours of transaction:10)

Meaning of Goodwill - Factors affecting Goodwill - Need for valuation of goodwill, Methods of valuation of Goodwill, Arbitrary Assessment, Average

profit method (simple average, Weighted Average and Annuity Method) Super Profit Method, Capitalization of profit method (Capitalization of average profit and Super profit)

Module III: Accounts of Holding Companies

(Hours of transaction:10)

Concept of holding company – Cost of control - Minority interest – Goodwill – Capital and revenue profits – Intercompany transactions – Contingent liabilities – Preparation of consolidated Balance Sheet (Theory and Problems) (Excluding Inter Company Owings & Intercompany Holdings. Simple problems only)

Module IV: Investment Accounting (Hours of transaction:10)

Meaning – Need for separate Investment Accounts – Classification of Scrips – Ex – Interest, Cum – Interest – Problems on Investment in Debentures and Shares- Treatment of Bonus Shares and Rights Shares (Theory and Problems) Inflation accounting: Need - Objections - Adjustments for General Price Changes - Current Purchasing Power Accounting (CPP) - CPP method of preparing financial statements.

STRATEGIC MANAGEMENT

SEMESTER	COURSE CODE	HOURS /WEEK	CREDIT	MARK 100		EXAM HRS
		/ WEEK		CE	ESE	IIKS
VIII	8B20ICOM	05	04	40	60	03

Objective:

Objective: The objective of the course is to help the students develop an understanding of the basic inputs in making and implementing corporate strategic decisions and also familiarise them with the issues and practices involved.

- To understand main concepts and levels of strategic management.
- To analyse the main structural features of an industry and develop strategies that position the firm most favourably in relation to competition.
- To know the resources and constraints for strategy making in a business context.
- To recognize the different stages of industry evolution and recommend strategies appropriate to each stage.
- To understand the concept of competitive advantage and its sources and the ability to recognize it in real-world scenarios.
- To develop recommendations that address the unique strategic issues of organizations.

Unit I

Introduction to Strategic Management Strategy - Concept and its evolution Strategic Management Characteristics, dimensions and Approaches to strategic Decision Making - Strategic Management Process Components of Strategic Management Model - Policies, Role of Top Management- Strategic implications of Social and Ethical Issues

Unit II

Strategic Analysis: Analysis of Broad Environment- Environmental Profile; Constructing Scenarios. Analysis of Operating Environment - Michael Porters Model of Industry Analysis. Analysis of Strategic Advantage – Resource Audit; Value Chain Analysis; Core Competences; SWOT Analysis. Analysis of Stakeholder Expectations – Corporate Mission, Vision, Objectives and Goals.

Unit III

Generic Strategy Alternatives – stability, expansion, retrenchment and combination strategies; variations strategy – Internal and external alternatives, related and unrelated alternatives, horizontal and vertical alternatives; International level strategic alternatives; Strategic choice- choice process, choice techniques, managerial factors.

Unit IV

Strategic Planning: Concept, Evolution of Strategic Planning, Levels of Strategic Planning, steps, alternatives, advantages and Disadvantages -Strategy Makers & Strategic Decisions, Dimensions of Strategic Decisions. - Designing an effective Strategic Plan-

Unit V

Strategy Implementation: Aspects, Project & Procedural Implementation, Resource Allocation, -Structural Implementation – Structural Considerations, Structures for Strategy, Organization Design and Change, Organization Systems- Behavioral Implementation – Leadership Implementation, Corporate Culture, Corporate Politics and Use of Power, Social Responsibility and Strategic Management, Personal Value and Ethics. Strategic evaluation and control – need, process and techniques.

Strategic Review: Evaluating Strategic Performance – Criteria and Problems. Concept of Corporate Restructuring

DATA MODELLING AND FORECASTING II

SEMESTER	COURSE CODE	HOURS /WEEK	CREDIT	MARK100		EXAM HRS
				CE	ESE	
VIII	8B21ICOM	05	04	40	60	03

Course Objectives:

- To deepen understanding of advanced business analytics methods.
- To introduce machine learning models, forecasting techniques, and optimization methods.
- To train students to apply analytical thinking for data-driven business decisions.

Module I: Advanced Methods in Business Analytics

- Review of BA lifecycle with emphasis on data-driven decision making
- Predictive analytics: concepts and stages
- Diagnostic analytics: root cause analysis, segmentation, classification
- Prescriptive analytics: decision optimization and what-if analysis
- Role of dashboards and scorecards in business performance management

Module II: Predictive Modeling Using Machine Learning

- Decision Trees and k-Nearest Neighbors (k-NN)
- Naïve Bayes classifier: intuition and application
- Clustering: k-Means, hierarchical clustering
- Evaluation: Cross-validation, ROC Curve, AUC, precision-recall

Module III: Forecasting in Business Analytics

- Recap of time series methods: moving average, exponential smoothing
- ARIMA models (introduction only)
- Forecasting tools: Excel, Python
- Use cases: inventory, sales, demand planning

Module IV: Prescriptive Analytics and Optimization

- Linear programming: decision variables, constraints, objective function (no derivation)
- Applications: transportation problem, resource allocation, product mix
- Tools: Excel Solver, LINGO, Python (scipy.optimize)
- Case study: supply chain or marketing mix optimization

BUSINESS DATA ANALYTICS AND MANAGEMENT

SEMESTER	COURSE CODE	HOURS/ WEEK	CREDIT	MARK 100		EXAM HRS
				CE	ESE	
VIII	8B22ICOM	05	04	40	60	03

Objectives:

- This course is intended to expose students to the latest tools of Business Analytics and applying those tools for effective decision making.
- Understand and articulate a business problem and convert it into a viable Analytics question
- Apply Data visualization for exploratory analysis and communicate effectively to diverse audience
- Evaluate various analytical approaches and select the most appropriate for the given problem
- Build Analytics solutions and assess their effectiveness
- To develop solutions across a range of functional areas like Marketing, Finance, HR and Operations

Course Outcome

- Demonstrate the awareness and Knowledge of Business Analytics
- Apply the basic concepts of analytics to the business scenarios and extend the knowledge about future trends in business analytics.
- To interpret the analytics methodology
- Attain application-oriented skills for data analyses, interpret results and draw inferences from the outcome.
- Develop capabilities to build automated financial models that will provide results for sensitivity analyses for changes in decision parameters.
- Assess the relevance and effectiveness of business analytics solutions
- Apply the knowledge of technical skills in descriptive and predictive modelling to support business decision-making

Unit I

Introduction to Business Analytics: Concept of analytics, Definition of analytics, Evolution of analytics, Need of Analytics, Business analytics vs business analysis, Business intelligence vs Data Science, Data Analyst Vs Business Analyst, Types of Analytics, Tools for Analytics. Concept of insights. Importance of data in business analytics Types of Analytics, Application fields - Marketing Analytics, Finance Analytics, HR Analytics, Operation Analytics, organization and source of data, importance of data quality, dealing with missing or incomplete data, Role of Data Scientist in Business & Society

Unit II

Introduction to Data for Business Decision-making

Meaning, Nature, Properties, Scope of Data ,Types of Data in Finance and Costing , Digitization of Data and Information , Transformation of Data to Decision Relevant Information, Communication of Information for Quality Decision-making ,Professional Skepticism regarding Data ,Ethical Use of Data and Information

Unit III

Data Processing, Organisation, Cleaning and Validation

Development of Data Processing, Functions of Data Processing, Analytics Methodology: Introduction to Analytics Methodology, preparing objectives & identifying data requirements, Data Collection, Understanding data, Data preparation – Data Cleansing, Normalisation, Data preparation, Data Blending, Data Modelling, Evaluation & feedback Unit IV

Data Presentation: Visualisation and Graphical Presentation

Data Visualisation of Financial and Non-financial Data, Objective and Function of Data Presentation, Data Presentation Architecture, Dashboard, Graphs, Diagrams, Tables, Report Design, Tools and Techniques of Visualisation and Graphical Presentation

Unit V

Business Analytics Future Trends: Role of Artificial Intelligence in Business, Machine Intelligence, Competitive Intelligence, Text Mining, Web Analytics (Web content mining, Web usage mining, Web structure mining), Role of Intelligent Agents in e-business, e-commerce, m-commerce, Location Analytics, Intelligent Agent in search & retrieval, Personalization and Comparison), Social Networking Analysis, Ethical and Legal considerations in Business Analytics

RESEARCH METHODOLOGY IN SOCIAL SCIENCE

SEMESTER	COURSE CODE	HOURS/ WEEK	CREDIT		ARK 00 ESE	EXAM HRS
VIII	8B23ICOM	05	04	40	60	03

Course Objectives

To acquaint the students with the concepts and techniques of research methodology and to develop the skill for doing research.

Course Outcomes:

After studying the course the students are able to;

- 1: Understand Research Methods and their application in social science
- 2: Understand the basic framework of research process.
- 3: Understand the ethical dimensions of conducting research..
- 4 .Understand application of various statistical testing in social science research

Module I- Social Science Research an Introduction

Research: Meaning-Significance-Objectives - Brief history of Social Science Research - Positivism and post positivism. Types of research - research methods vs Methodology .Research Process (10 hours)

Module II- Research problem and Design

Research Problem- Nature-formulation of research problem – Sources of identifying research problems – Techniques involved in defining a problem. Review of Literature – Need for review -Identifying Research Gaps. Research design- Meaning, need, types of research design – features of a good design. Designs for exploratory research- Design for descriptive research – Experimental designs. Variables-dependent, independent - extraneous variables-moderating variable intervening variable. Research proposal -Research hypothesis-Sources of hypotheses- Types of hypotheses. (20 hours)

Module III: Sampling Techniques and Data Collection Methods

Probability and non-probability sampling techniques-sample size-sampling errors-sources of collection of data- Techniques and tools for data collection-Pre testing and Pilot study (Review only). (10 hours)

Module IV: Statistical Estimation and Hypothesis Testing

Estimation-Qualities of a good estimation, Criteria for selecting estimation, Methods of estimation, point and interval Estimation, confidence interval, determination of sample size

in estimation. Testing of Hypothesis-Need and Significance of hypotheses-Formulation, Types of hypotheses-errors in testing hypotheses-type-I and Type-II errors-one tailed and Two tailed tests-level of significance-Parametric tests-large sample and small sample tests-Z test, t-test, F-test application of parametric tests. Non-parametric tests-Chi-square test, Sign test, Fisher-Irwin test, rank sum test, Run test, Mann-Whitney U test, Kruskal Wallis H test, Wilcoxon test, Analysis of Variance-Meaning-Assumptions of ANOVA, Techniques of ANOVA One way classification-Two-way classification-Setting up ANOVA table, Conditions for application and uses of ANOVA-Interpretation of analysed data. (25 hours)

Module V- Interpretation and Research reporting

Significance -Characteristics of a good research report – Steps in report writing –Layout of research report -Types of report. Citing references using APA style -Plagiarism – Consequences of plagiarism. (10 hours)

Unit Wise Weightage for Question Paper Settings

INTERNATIONAL BUSINESS

SEMESTER	COURSE	HOURS CREDIT		MARKS		EXAM
	CODE	/ WEEK		CE	ESE	HOURS
VIII	8B24ICOM	05	04	40	60	03

Objectives: -

- To know the procedure of operating business internationally
- To evaluate the opportunities in respect of different countries
- To explore the avenues of entering the International Market

Course Outcome

- Define and understand the drivers of globalization.
- Analyse the changing dimensions of international trade and appreciate the role of trade theories in explaining trade patterns in different industries.
- Apply the concepts of marketing strategies for entering into international markets.
- Utilize the conceptual understanding of Balance of Payment and Trade and its relevance in India's context.
- Interpret the strategies that work as competitive advantage in industries like IT, Textiles, Gems and Jewelries.

UNIT-1

International business: Meaning- Factors influencing international business- Types of operation- Challenges in international business- Multinational enterprises. Environment of international business: International politics and economic integration-International culture -International trade and marketing -International finance.

UNIT- II

Levels of integration – arguments for and against regional integration - Trade Blocks - European Union (EU) – The Association of Southeast Asian Nations (ASEAN) – Asia-Pacific Economic Cooperation (APEC) – North American Free Trade Agreement (NAFTA) and The South Asian Association for Regional Cooperation (SAARC). International market entry strategies - Market selection - Barriers. Managing Multinational Corporations (MNCs) - Problems and Potential - Indian Multinational Corporations (MNCs) Problems and Potential. International product decisions.

Unit III

International pricing decisions –Transfer pricing –Dumping- Retrograde pricing – counter trade – INCO Terms. Export promotion (with regard to India) – Organizational structure – Export financing, incentives. Export procedure and documentation.

Unit IV

India's Balance of Trade and Balance of Payment. India's trade: Direction, Composition & Trend. Foreign Direct Investment (FDI) & Foreign Portfolio Investment (FPI) investment in India, by Indian companies abroad. Global sourcing and its impact on Indian Industry - India's competitive advantage in industries like Information Technology (IT), Textiles, Gems & Jewellery etc. - Potential and threats.

Unit V

International institutions: International Monetary Fund, Asian Development Bank and World Bank group (International Bank for Reconstruction and Development (IBRD) and the International Development Association (IDA) - (International Finance Corporation (IFC), Multilateral Investment Guarantee Agency (MIGA) and the International Centre for the Settlement of Investment Disputes (ICSID)) General Agreement on Tariff and Trade, (GATT), World Trade Organization (WTO) - Dispute settlement mechanism under WTO.

INVESTMENT ANALYSIS AND PORTFOLIO MANAGEMENT

SEMESTER	COURSE CODE	HOURS /WEEK	CREDIT	MARK 100		EXAM HRS
				CE	ESE	
IX	9C05ICOM	05	04	40	60	03

Course Objectives:

- To familiarize the students with concepts of investment so as to orient them towards investment advisory skills.
- To enrich them to handle modern portfolio techniques to construct efficient portfolios.
- To develop better understanding on evaluation and revision of the inefficient portfolios.

Course Outcomes:

On completion of this course, students will be able to

- Apply the theoretical knowledge in investment information for selecting the securities.
- Understand the tools of technical analysis, analyse the patterns and trends in the market
- Applying Modern portfolio theories and construct optimum portfolios.
- Revising constructed portfolios as per risk and return association by using different strategies.

Module 1-

Investment: Concept- Characteristics-Types-Objectives of Investment- Types of investors – investment vs. speculation – investment vs. gambling – speculation vs. gambling- Investment process – investment information – sources of investment information. (15 Hours)

Module II

Security Analysis: Fundamental Analysis-Economic Analysis-Industry Analysis-Company Analysis-Technical Analysis- Meaning – basic assumptions – Dow theory – Elliot wave principles-Charts: line charts, bar charts, point and figure charts, candlestick chart – trends: support and resistance level- Chart patterns – types of trends – head and shoulders – inverted head and shoulders – double top and bottom – rounding bottom – triangles, flags, gaps- Fundamental vs. technical-Elliot wave theory- Efficient market theory – Forms of market efficiency, Weak form efficiency random walk hypothesis, semi strong and strong form efficiencies (30 Hours)

Module III

Portfolio Analysis- Concept - Uses – Importance – portfolio construction – approaches – traditional approach – modern approach – portfolio risk and return – Portfolio Management Theories (30

Hours)

Module IV

Portfolio Evaluation and Revision- Meaning – need – different tools – Sharpe's performance index – Treynor's performance index – Jenson's performance index – Fama's performance measure-Portfolio revision – meaning – need – approaches – passive management – active management-Portfolio revision strategies – rebalancing strategies (25 Hours)

DERIVATIVES AND RISK MANAGEMENT

SEMESTER	COURSE CODE	HOURS/ WEEK	CREDIT	MARK 100		EXAM HRS
				CE	ESE	
IX	9C06ICOM	05	04	40	60	03

Course Objectives:

To equip students with principles and techniques of Derivatives and its Greeks, and Risk Management through stock market.

Course Outcomes:

- 1. Understand derivative in detail such as forward, futures, options, Greeks, swaps etc.
- 2. Understand of option pricing models
- 3. Understand the concept of hedging, speculation and arbitrage. Course Contents:

Unit I

Introduction to derivatives: Definition, types of derivatives, Uses of derivatives, Exchange-traded vs. OTC derivatives, Derivatives in India, Regulation for derivatives trading and SEBI guidelines related to derivatives trade.

Unit II

Introduction to Forwards and Futures: Basic Hedging practices, Forward contracts, Determination of forward and futures prices Limitations of forward markets, Introduction to futures, Stock Index futures, Commodity Futures and Currency Futures,). Distinction between futures and forwards contracts, pay-offs, Cash settlement vs Physical settlement, Pricing Principles, Beta and Optimal Hedge Ratio.

Unit III

Options and its type, Factors affecting option Prices. Put & call parity theorem. Trading strategies involving options: payoffs call & Put (both buyer and seller), Spreads (Bull, Bear, Box, Butterfly and Calendar Spread), combinations (Straddle, Strangle, Strip, Straps), Options on Stock Indices and currency.

Unit IV

Swaps: Meaning, overview, interest rate swaps, currency swaps, credit risk, mechanics of swaps. Credit Derivatives: Types of Credit Derivatives, Credit Default Swaps, Collateralized Debt Obligations, The Indian Scenario, credit risk mitigation, Weather and Energy Derivatives

Unit V

Risk Management with Derivatives: Hedging Using Greeks (Delta-Gamma Hedging), Hedging with Futures (Strategies of hedging, speculation and arbitrage): Index Options and futures, VaR, Historical Simulations, Risk management structure and policies in India.

ORGANISATION BEHAVIOUR

SEMESTER	COURSE CODE	HOURS /WEEK	CREDIT	MARK 100		EXAM HRS
		/ VV ESEX		CE	ESE	
IX	9B29ICOM	05	04	40	60	03

Course Objectives:

- To expose the students to the fundamentals of Organizational Behavior (OB)
- To familiarize the students with the basic concepts of individual behaviour, group behaviour and organizational behaviour
- To help students develop a conceptual understanding of OB theories
- To acquire knowledge regarding the organizational change and organizational development, organisational conflict
- To enable the students to put the ideas and skills of OB into practice

Course Outcomes:

On completion of this course, students will be able to

- Understand the dynamics of individual and organizational behaviour and relationships
- Understand and deal with organisational change, development and climate and conflict
 - Analyse the importance of organizational behavior in managerial functions
 - Apply organisational concepts to interpret events, situation and people

Module I

Foundations of Organizational Behaviour (OB): Concepts-Nature-Determinants-Models-Role-Challenges and Opportunities-Major disciplines and their contributions to OB

(15Hours)

Module II

Foundations of Individual Behaviour: Factors-Individual Differences- Personality-Concept-Determinants -Theories of Personality, Personality Traits-Perception: Factors-Perceptual Process, Learning: Concept-Factors-Theories of Learning, Reinforcement-Attitudes and values-Perception

(20 Hours)

Module III

Group Dynamics: Concept and Nature of Group-Types of Groups and Cliques-Stages in Group Development-Theories of Group Formation, Group Behaviour: Factors-Group Norms-Group Cohesiveness. Transactional Analysis (20 Hours)

Module IV

Motivation- Concept, Theories of Motivation, Motivation and Behaviour, Organisational Climate and Culture: Concept-Characteristics-Determinants-Organisational Change

(20 Hours)

Module V

Organisational Development: Concept-Characteristics-Benefits-Objectives-OD Interventions, Organisational Conflict: Concept-Functions-Stages-Levels of Organisational Conflict. (15 Hours)

ADVANCED COST ACCOUNTING

SEMESTER	COURSE CODE	HOURS /WEEK	CREDIT	MARK 100		EXAM HRS
				CE	ESE	
IX	9B30ICOM	05	04	40	60	03

Course Objectives:

- To enable the learner to apply principles and techniques of Cost accounting in decision making situations
- To enable the learners to understand, develop and apply the techniques of costing in the decision making in the business corporate
- To enhance the abilities of learners to develop the concept of Cost accounting and its significance in the business

Course Outcomes:

On completion of this course, students will be able to

- Understand activity-based costing and target costing principles
- Understand the concepts of responsibility accounting practices
- Understand the concepts of standard costing, and the process of cost control through it.
- Apply the marginal costing principles in decision making situations of businesses.

Module I

Activity Based Costing – Introduction, Advantages, Limitations, Identification of cost drivers, Practical Problems on Traditional V/s Activity Based Costing System- Target Costing - Introduction, Concept, Objectives, Comparison between Target Costing and Cost-Plus Pricing (15 Hours)

Module II

Responsibility Accounting – Meaning, Features, Objective, Assumptions, Problems, Responsibility Centre's – Cost, Profit, Revenue and Investment. Transfer Pricing - Introduction, Advantages and Disadvantages, Setting Transfer Pricing - Negotiated transfer pricing, Cost Based transfer pricing. (20 Hours)

Module III

Standard Costing: Concept of standard cost and standard costing- objectives-Advantages and Limitations of Standard Costing-Standard cost system- Analysis of Variance-Meaning-Importance-Features-Types of Variances-Problems. (25 Hours)

Module IV

Marginal Costing and Applications: Marginal costing – Marginal Costing Equation – Breakeven Point – Profit Volume Ratio – Advantages and Limitations of Marginal Costin- Cost volume profit analysis – Computation of PV Ratio and Break-Even Point- Make or Buy Decision - Margin of Safety – Effect of Change of sale price on overall BEP – Effect of change in product mix on BEP and PV Ratio-Managerial Applications of Marginal Costing (30 Hours)

ECONOMETRICS

SEMESTER	COURSE CODE	HOURS /WEEK	CREDIT	MARK100		EXAM HRS
				CE	ESE	
IX	9B31ICOM	05	04	40	60	03

Course Description: The objective of this course is to introduce the student to the econometric methodology which is widely used in empirical works.it intends to expose the students to the art of performing estimation analysis and interpretation of the econometric model designed to capture real world. It prepares the students to better analyse the world around.

Course Outcomes:

CO No.	Expected Outcome
1	Understanding of the discipline and application of the subject
2	Represent theoretical concepts in relation to econometric terms
3	Estimating simple and multiple linear regression
4	Analysis and estimation of both qualitative and quantitative data
5	Understand analyse and interpret econometric results

Module I Introduction to Econometrics

Definition and Scope of Econometrics – Why study Econometrics? – Relationship between Economic theory, Mathematics and Statistics – Division of Econometrics – Nature and sources of data for Econometric analysis – Methodology of Econometric Research – Desirable properties of an Econometric model – Limitations of Econometrics. (20 hours)

Module II Two variable regression analysis

Stochastic and non-stochastic variables - The concept of Population regression function and its stochastic specifications –the meaning of the term Linear - The Sample regression function - Ordinary least squares (OLS) method - Assumptions - properties of OLS estimators: Gauss-Markov Theorem - statistical testing of regression coefficient: coefficient of determination (r2) - standard error test - the exact level of significance: p-value -.(25 hours)

Module III Multiple regression analysis

Multiple linear regression model – assumptions – OLS estimation – variance and standard error – Hypothesis testing – goodness of fit – Estimating three variable production function: Cobb-Douglas production function (25 hours)

Module IV Problems in OLS estimation

Violation of Classical assumptions of regression model Violation of Classical assumptions of regression model: Meaning, Causes, Consequence Detection and remedial measures of Multicollinearity – Heteroscedasticity – Autocorrelation (30 hours)

WORKING CAPITAL MANAGEMENT

SEMESTER	COURSE CODE	HOURS/ WEEK	CREDIT	MAI 100 CE	RK ESE	EXAM HRS
X	10C07ICOM	05	04	40	60	03

Course Objectives

To understand the role of working capital in a company's financial structure and daily operations

Course Outcomes:

After studying this course, the students shall be able to;

- 1: Explain the concept and fundamental factors related to the Woking capital management
- 2: Describe the concept of working capital and computation of working capital
- 3. Understand cash and liquidity management in practical; situations
- 4. Understand the concept and working of receivable management
- 5. A clear understanding on inventory control

Module 1: Introduction to Working Capital Management

Working capital - Meaning, Definition, Concepts of working capital -Balance sheet concept, operating cycle concept. Classifications of working capital. Factors determining working capital requirement. Principles of working capital management policy .Methods of estimating working capital requirement (20 hours)

Module 2: Cash and Liquidity Management

Management of cash: Motives of holding cash. Cash management – Methods of accelerating cash inflows, Methods of slowing cash out flows. Approaches of determining optimal cash balance - Cash budget. Cash management models (20 hours)

Module 3: Receivables and Payables Management

Receivables Management and factoring: Meaning, cost of maintaining receivables .Factors influencing the size of receivables .Dimensions of receivable management .Factoring: Meaning,

Mechanism, Benefits, Functions of a factor, and Types of factoring .Financial evaluations of factoring (simple problems only) (15 hours)

Module 4: Inventory Management

Inventory Management: Inventory -Meaning and nature, Purpose .Inventory Management - Objectives, Tools and Technique of Inventory Management – Stock Level, EOQ, A-B-C Analysis, VED Analysis, JIT, and Perpetual Inventory System (20 hours)

FINANCIAL REPORTING

SEMESTER	COURSE	HOURS CREDIT		MARKS		EXAM
	CODE	/ WEEK		CE	ESE	HOURS
X	10C08ICOM	05	04	40	60	03

Course objectives

- To sensitise the students about the problems of accounting such as measuring and reporting issues related to assets and liabilities and preparing the financial statements.
- . To make the students familiar with the financial reporting standards issued by IASB and its application in India.
- To develop an understanding among the students about the various forms of reporting (other than financial statements) and accounting for special transactions and apply such knowledge in problem solving.

Course outcomes

- Gain the skill of using accounting information as a tool in applying solutions for managerial problems, evaluating the financial performance, interpreting the financial structure and analysing general purpose financial reports;
- Acquire the ability to integrate and solve problems in practical scenarios on Accounting Standards, Guidance Notes and Indian Accounting Standards for deciding the appropriate accounting treatment and formulating suitable accounting policies;
- Evaluate different types of performance measurement systems in accounting and commonly used financial control systems;
- Combine practice and theoretical knowledge of financial accounting and develop awareness of emerging trends in financial accounting
- Demonstrate proficiency with the ability to engage in competitive exams like CA, CS, ICWA and other courses

Unit I

Financial Reporting: Concept, Objectives – Users Purpose of Financial Reporting and Specific Purpose of Report – Segment Reporting – Difficulties in Segment Reporting – Interim Reporting – Problems in Interim Reporting – Improving Financial Reporting

Unit II

International Financial Reporting Standards: Meaning, History, Objectives, Scope; Convergence of Indian Accounting Standards with IFRS: Current Status and Challenges; IASB: History, Objectives, Scope; FASB: History and its Pronouncements. Harmonization in Accounting and Reporting

Unit III

Financial Disclosures and Reporting: Objectives and Concepts, Developments on Financial Reporting Objectives: True blood Report, Corporate Report, Stamp Report, IASB's and FASB's Conceptual Framework, Corporate Annual Report, Segment Reporting and Interim Financial Reporting

Unit IV

Corporate reporting International financial reporting qualities; Objectives of corporate financial reporting; Development of financial reporting objectives: Accounting Principle Board (APB, Statement; Financial Accounting Standard Board (FASB); True-blood report and Stamp report objectives; Specific purpose reporting; Reporting by diversified companies - Segment reporting: Nature, objectives and problems; Disclosure requirements of different users group of segment reporting; Interim reporting: Nature, objectives, problems and suggestions to improve interim reporting; Harmonisation in reporting: Nature, need, benefits and obstacles in convergence and harmonisation; Suggestions for increased convergence and harmonisation; Corporate governance reporting; Value added reporting and HR Reporting

Unit V

Recent Developments in Financial Reporting: Value Added Statement, Economic Value Added, Market Value Added, Shareholders' Value added, Human Resource Reporting (Case Studies), corporate environmental accounting and audit, Accounting for carbon credit.
