LLCRI02E03COLLECTIVE VIOLENCE AND CRIMINAL JUSTICE SYSTEM

Objectives of the course

This is a crucial area of Indian development with which traditional, western, criminology is not overly preoccupied. Collective political violence (CPV) is the order of the day, whether it is agrarian (feudal) violence, or it is atrocities against untouchables, communal riots, electoral

violence, police violence (encounters), political violence by militant and extremist groups, gender based violence or violence involved in mercenary terrorism and its containment.

It is not very helpful in such contexts, to mouth the generalities such as "criminalization" or "lumpenization" of Indian politics. Closer scientific investigation of these phenomena is crucial, which should help us understand both the etiology and the prognosis of CPV. Instead of political analysis, the course should focus on a broader social understanding of the political economy of law in India. Each specific form of violence will be examined with a view to identifying the course of its evolution, the state law response policies of management of sanctions, compensation and rehabilitation of victims of violence, social and political costs. The growth of police and paramilitary forces will also, in this context, be an object of study. Primary materials here will be governmental and citizen investigative reports. The emphasis of the course will be on fashioning overall democratic understanding and responses to meet this problem.
